Professional Summary

Results-driven Frontend Developer with over one year of professional experience engineering responsive, accessible, and high-performance web and mobile applications using React, Next.js, React Native, and Redux Toolkit. Proven track record delivering production-grade fintech platforms, government portals, SaaS applications, and published Play Store releases. Proficient in TypeScript, Tailwind CSS, RESTful APIs, Docker, and cloud deployments; committed to scalable architecture and SOLID, DRY engineering principles.

Technical Skills

- **Frontend & Mobile:** React, React Native, Next.js, Redux Toolkit, Tailwind CSS, Material-UI, Bootstrap, Framer Motion, Responsive Design
- **Languages:** JavaScript (ES6+), TypeScript, Python, C++
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, GraphQL, JWT, OAuth 2.0, PostgreSQL, Prisma, Docker, Supabase, Firebase, MongoDB
- **Deployment & DevOps:** Vercel, Netlify, Render, AWS Lightsail, Git, GitHub, CI/CD Pipelines, Google Play Console
- **Concepts:** Data Structures & Algorithms, OOP, SOLID Principles, DRY, DBMS, Operating Systems, Computer Networks

Professional Experience

Meon Technologies

June 2025 – Present

Frontend Developer

- Architected and delivered multiple products from the ground up, including OCR Admin, Super Admin, Chatbot Admin, NCD IPO end-to-end platform, and a Central Tool for cross-product company management.
- Engineered fintech workflows across IPO processing, demat account closure, KYC/re-KYC verification, PDF Editor, and developer tools, ensuring reliable and consistent user experiences.
- Optimized the Meon public website for SEO, Core Web Vitals, and accessibility, improving page performance and organic discoverability.
- Triageed and resolved production bugs across legacy jQuery/HTML/CSS codebases and modern React-based applications, reducing critical issue backlog.
- Implemented scalable UI architecture leveraging React, Vite, Next.js, Tailwind CSS, and Redux Toolkit for centralized state management.
- Collaborated cross-functionally to build internal admin dashboards that streamlined operations and improved product management workflows.

Blue Digital Media, Noida, UP

September 2024 – June 2025

React Developer

- Delivered a fully responsive, accessible UI for Snapit.ae using React, Vite, Tailwind CSS, and Framer Motion.
- Engineered the Abu Dhabi Sports Council Events Portal, a government-grade event booking and approval platform featuring advanced search with filters and pagination, Google Maps integration, and a bilingual English/Arabic language switcher.
- Improved application performance and cross-browser compatibility by diagnosing and resolving layout, styling, and rendering issues.
- Authored custom React hooks and Redux Toolkit state management patterns, consistently adhering to SOLID and DRY principles.
- Integrated OAuth 2.0 authentication via Google and Facebook, streamlining user onboarding and login flows.

- Participated in Agile sprints to refactor legacy codebases and enforce modern development standards across the team.

Blue Digital Media (Remote)

August 2024 – September 2024

Frontend Developer Intern

- Developed the Elsopro.com CRM platform frontend serving 60,000+ vendors using React, Tailwind CSS, and Redux Toolkit, with a focus on scalability and maintainability.
- Implemented interactive UI animations with Framer Motion to enhance user engagement and interface responsiveness.
- Integrated Google Maps API to power dynamic, location-based vendor search functionality.
- Delivered a fully responsive interface on schedule, improving overall platform usability and accessibility.

Projects & Freelancing

Bloggy

Live | GitHub

- Built a full-stack blogging application with JWT-based authentication, full CRUD post management, and a responsive UI using React and Material-UI; deployed end-to-end on Render.

Blabber Bot

Live | GitHub

- Engineered an AI-powered chatbot integrating the OpenAI API for text summarization, content generation, and image creation; deployed frontend on Netlify and backend on Render.

Client Websites

- Designed and developed high-conversion, responsive landing pages for clients including services.bluedigital.co.in, vertexgridsystems.com, and amhtourism.com – a full tourism portal featuring interactive maps, dynamic itinerary planners, and responsive media galleries to drive visitor engagement.

Personal Projects

Sanjana

Google Play

- Shipped **Sanjana**, an AI companion mobile application where users chat with configurable personas; published on Google Play.
- Built the native client with **React Native** and engineered the backend using **Node.js**, **Express**, **Prisma**, and **PostgreSQL**, containerized with **Docker**.
- Deployed backend services on **AWS Lightsail**; designed APIs and persistence for conversational flows and persona-driven chat experiences.

Dcoify

Live | GitHub

- Built a production-ready SaaS application using Next.js, Tailwind CSS, shadcn/ui, PostgreSQL, Prisma, Node.js, and Express.js.
- Implemented multi-factor authentication (MFA) with backup key recovery to strengthen account security.
- Added multilingual support and bring-your-own API key (BYOK) functionality for flexible, user-controlled configuration.
- Integrated Lemon Squeezy for secure payment processing and subscription-based monetization.

VedAI

Live | GitHub

- Developed a full-stack AI-focused web application with Next.js, Tailwind CSS, shadcn/ui, PostgreSQL, Prisma, Node.js, and Express.js.
- Implemented MFA with backup key support, multilingual accessibility, BYOK functionality, and Lemon Squeezy payment integration for premium access workflows.

Education

- **B.Sc. Agriculture (Honours)**, College of Agriculture, Nagpur (Dr. PDKV) 2020 – 2024
